# Classwize
Data Sheet

Empowering teachers to drive better outcomes.

In today's internet-connected classrooms, teachers need greater visibility and management over what and how their students are accessing the internet.

Greater student engagement

Classwize is a simple-to-use, highly effective dashboard that lets teachers see and shape internet access in real time, to help students stay focused and avoid digital distractions.

Classwize allows teachers to have full screen visibility of every supported device in their classroom. With flexibility to manage students at an individual or class level, teachers can message students or the entire group as well as open tabs for the class or individual students. Teachers can also incentivise the right behaviour by rewarding students by allowing time-limited access to sites that are normally blocked.

✓ **Outstanding visibility**
See which students are on task, and which are distracted - with screen monitoring.

✓ **Granular control**
Open or close tabs for individuals, groups or the entire class.

✓ **Immediate feedback**
Spot inappropriate or off-task internet use as it happens, and redirect attention as needed.

✓ **Reward focus**
Promote responsible digital citizenship by identifying and rewarding model online behaviour.

Make classroom online activity an open book

Classwize provides full-screen visibility on all school-issued devices to keep students learning and teachers teaching.

✓ **Teacher dashboard**
Equips teachers with real-time visibility and control over student internet activity

✓ **Tailored policies**
Creates flexible, customizable access policies

✓ **Control of tabs and apps**
Restricts learners' access to specific apps and sites during lesson time

✓ **Reward good behaviour**
Guides and reinforces responsible use by students whose constructive internet use can be a model for others

✓ **Focus, focus, focus**
Empowers teachers to tailor internet access to the lesson at hand, plus teacher/student chat

✓ **Create custom access rules**
Allows access to content that may normally be blocked for the purpose of individual lessons

My classes feature
We've made more classes available on your My Classes dashboard by resizing and streamlining class tiles. You still have quick access to class details, like class size, class type, and session, as well as class settings.

"

Classwize was not just about filtering out inappropriate websites but enabling teachers to empower students with the ability to use the internet appropriately."

Veronica Stevens, Deputy Principal
Wellesley College
